developed in the main warehouse at CD during the week because of  
the severe snowstorm. Water backed up in crevices on the roof.  
Five Depot personnel volunteered to shovel snow to speed the  
flow of water off the roof. After the snow was shoveled, the  
leaks stopped except for a minor one in the disposal area. The  
heavy amounts of water were attributed to extremely mild weather  
conditions and the unusually quick thawing of the snow. GSA

the weather improves. [ ]
